Manuscript: Governing Human–AI Collaborative Project Workflows in Multi-Platform Digital Delivery: A Design Science Study of Auditable Handoffs and Idempotent Release Operations

Author: HuaiCheng Sheng (Agentic Work Lab, Hangzhou Chengxin Holding Group Co., Ltd., Hangzhou, Zhejiang, China | ORCID: 0009-0003-2900-6377)

- A four-layer stage-gate design governs human–AI delivery to five platforms
- Receipts are saved as UNKNOWN before the one final submit; no auto re-submit
- A 69-record field journal shows one platform write and no replayed upload
- In one Instagram run, 92.32% of the publish command was the wait after Share
- Descriptive channel data are kept apart from causal claims about AI output

#	Highlight	Characters (incl. spaces)
1	A four-layer stage-gate design governs human–AI delivery to five platforms	74 / 85
2	Receipts are saved as UNKNOWN before the one final submit; no auto re-submit	76 / 85
3	A 69-record field journal shows one platform write and no replayed upload	73 / 85
4	In one Instagram run, 92.32% of the publish command was the wait after Share	76 / 85
5	Descriptive channel data are kept apart from causal claims about AI output	74 / 85
